The video was presented before the whole students and teacher community, and was uploaded in the YouTube as well. The programme was intended to study and make known to our students, about the rich heritage and the folk culture of Himachal Pradesh natives. Also, we tried to read the song from the Keralite perspective too by adding a Keralite expression through the classical dance performance by the students, which made a better reading possible. So, the video is an attempt to pair Kerala and Himachal Pradesh by giving a Keralite visual experience to the Himachali music.
